

William L. Murphy

ABOUT THE AUTHOR

William L. Murphy grew up in northern New York State, where his parents interested him in birdwatching at the age of four by showing him a Least Bittern. Since then his birding travels have taken him throughout North America and the Caribbean. He leads birding tours for the Smithsonian Institution, the Audubon Naturalist Society of Washington, and the Maryland Ornithological Society, as well as for other tour companies. When not travelling Mr. Murphy operates Peregrine Enterprises, Inc., an international birding tour company, and works for the federal government as a technical information specialist and computer programmer.

Mr. Murphy and his family live in Greenbelt, Maryland.

"... this handbook... is a gold mine of information on birding these islands. It first provides detailed information on arrangements (transportation, lodging, car rental, guide services, tours, money exchange, etc.), then, in the heart of the book, gives thorough treatment to the islands' best birding spots, with very specific directions. Also included is a list of birds frequently missed by visitors and where to look for these species."

Bird Watcher's Digest

"If you're planning a trip to these hotspots, you'll need A Birder's Guide to Trinidad and Tobago. Bill Murphy has packed a lot of useful information into this 125-page book."

The Chat

"Written in a pleasant, conversational style with candid, objective evaluations and descriptions, it's a must for the birder who wishes to see as many birds as possible in a short time. It's equally valuable to any visitor with little prior knowledge of the birds of the tropics. If other authors follow Murphy's lead, they cannot fail. If you bird the tropics, buy this book. You'll eliminate many hassles, see more birds, and save the price of the book within the first few hours..."
